

Sample Report

About This Sample

This example is two pages from a 30+ page report which summarized the patient characteristics, therapy and outcomes from a physician's patients, and compared them to the database. We needed a polished appearance, geared to the medical professional. When completed, this program produced over 200 individualized reports in .PDF format, ready to be printed.

Some noteworthy features of this example:

- Sophisticated page layout, with "branded" headers and footers
- Mixing formatted text, tabular data and graphics on the same page
- A highly customized graphical representation of multi-dimensional data (on page 2 of this report)
- A bulleted list—you're looking at it now—which is not only indented but wraps in the conventional way, with text left-aligned and bullets "undented"

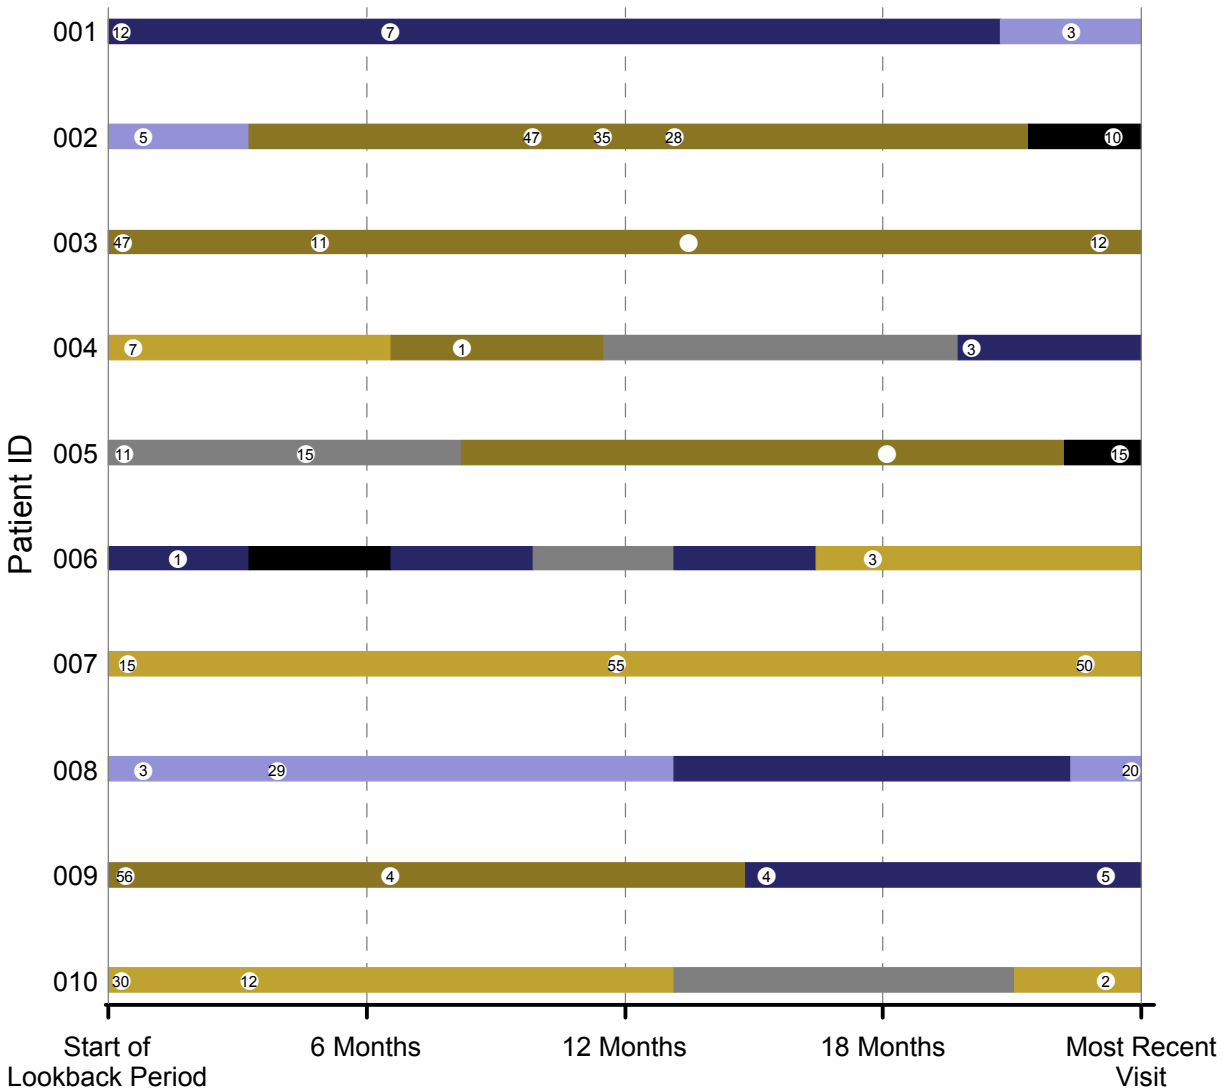

All produced entirely from SAS!

Primary Column Header	Column 1	Column 2	Column 3	Column 4
Row 1	11	12	13	14
Row 2	21	22	23	24
Row 3	31	32	33	34
Row 4	41	42	43	44

Treatment Summary

Patient Timelines

The chart below summarizes the treatments received by patients. The horizontal axis is a timeline that depicts a 2-year treatment period. Each horizontal bar represents the treatments received by a single patient. Patients are labeled with their Patient ID and are plotted on the vertical axis.

2-Year Lookback Period

- Drug Combo 1
- Drug Combo 2
- Drug 1 Mono
- Drug 2 Mono
- Other
- Untreated

⓪ Patient Visit (n=lab value, if available)
